

Your Partner in Learning and Workforce Development

End-to-End Solution

Valamis Learning Solution includes everything organizations need to support a modern learning culture. Learners can access a vast array of learning opportunities from a single UI.

Partnership

Valamis focuses on building a strategic partnership along with being a platform provider. We bring in a multi-disciplinary team to accomplish your organization's learning goals.

Complete Analytics

Learner activity can be collected automatically with xAPI. Using Valamis analytics to analyze the learning data, organizations can enrich the learning experience by measuring its impact.

The complete end-to-end ecosystem designed for you

Valamis works as a strategic partner that allows you to upskill and reskill your team while maintaining your learning tech stack with one centralized core—streamlining costs and complexity.

Our experts work with your team to design a solution that fits you and your people. You get everything you need to support a modern learning culture from one partner. Valamis Learning Solution brings modern LMS and LXP capabilities with a built-in content authoring tool, eCommerce, LRS, and learning analytics.

Deliver engaging experiences in Valamis utilizing text, images, videos, and quizzes or import ready-made materials. Learners can also create and share learning with their peers. With eCommerce, you can sell training to your customers, partners, resellers, and other networks.

When you require more than in-house content, tap into Valamis Learning Solution's integration framework and

connect popular content providers such as LinkedIn Learning, Udemy Business, and Harvard Business Publishing into your ecosystem. The solution also integrates with Microsoft Teams, Slack, ERPs, CRMs, YouTube, and other internal or external systems.

Learning analytics allow you to connect learning activities and employee performance, ultimately helping you improve your development programs' effectiveness.
