

Valamis with Liferay

Instead of being an isolated activity, learning should be embedded in our everyday activities. Learning and development should occur in the flow of work by absorbing content from multiple sources like: online expert articles, communities, MOOCs, company internal communications, intranet, and the online learning tools provided by the employer throughout the entire career. The solution used has to be device-independent, allowing access and rich user experience with both mobile and desktop devices 24/7.

What makes Valamis LXP and Liferay DXP so powerful together?

Valamis - Learning Experience Platform (LXP) is built on top of Liferay EE. By combining the core strengths of the Liferay DXP and Valamis LXP, you are able to engage your learners with personalized learning experiences and meet the technological needs of modern learning.

Take organizational learning to the next level

Create your own digital learning ecosystem

- ◆ Single-point access to all learning data: Learning platform, intranet, extranet, CMS, LcMS, and any business integrations you might need.
- ◆ Valamis is capable of utilizing machine learning, artificial intelligence, and can be used to support enterprise performance management. This pairing can help you improve productivity by using a single solution to collect different data to Valamis' Learning Record Store (LRS).
- ◆ Liferay's capabilities for a 'customized look and feel' theme allows you to create a customized learning academy according to your company's own brand.
- ◆ Liferay features are all compatible with and complementary to the capabilities of Valamis, allowing for greater creative freedom and customization of your learning environment. Valamis LXP can utilize all the out-of-the-box functionalities of Liferay, such as:
 - › User management
 - › Permission and role management
 - › Sites and site templates
 - › Pages and page templates
 - › Documents, media, wikis
 - › As well as many ready made components for collaboration: message boards, chats, pools, blogs, ratings and comments, and so on.

Ensure scalability & flexibility

- ◆ Make technology work for your unique needs. If your business and the number of learners is growing, you can easily scale up Valamis LXP.
- ◆ Valamis LXP adds to the Liferay’s components its own capabilities, packaged as portlets. Some common examples are those for building and managing learning materials (Lesson Studio, Lesson Manager, Content Manager), management of learning activities (Learning Paths, Training Events), skills management (Competencies Matrix), as well as embedded learning analytics (Learning Record Store, Gradebook, Learning Pattern Report).

Liferay and Valamis in action

Organizations that run Liferay can easily increase the value of the platform by adding Valamis LXP and almost instantaneously offer self-paced learning to their employees, customers, partners, and so on.

Show me the benefits!

- ◆ Lower total cost of ownership: synergy benefits of a single solution (chart below)
- ◆ Decreased training costs per individual learners
- ◆ Time savings: train exactly the right people exactly when they need training
- ◆ Impact to work: ability to measure and connect different aspects of behavior inside environments to on the job performance.
- ◆ Impact to business: make your learning strategy support your business goals. Measure and analyze to ensure learning is reaching set goals.
